Melanoma Fact Sheet
There is an urgent need to increase awareness and improve the diagnosis and treatment of melanoma

IT’S A FACT!

- Melanoma is the deadliest form of skin cancer. Skin cancer is the most common form of cancer in the U.S.

- Every hour of every day one American dies from melanoma.

- In 2015, it is expected that approximately 74,000 Americans will be diagnosed with Stage I-IV melanoma and another 63,000 will be diagnosed with melanoma in situ – totaling nearly 137,000 diagnoses.

- Melanoma is one of the fastest growing cancers in the U.S. and worldwide.

- Melanoma does not discriminate by age, gender or race. Everyone is at risk.

- Melanoma is the leading cause of cancer death in women ages 25-30 and the second leading cause of cancer death in women ages 30-35.

- In ages 15-29, melanoma is the second most commonly diagnosed cancer.

- The incidence of people under 30 developing melanoma is increasing faster than any other demographic group, soaring by 50% in women since 1980.

- Nearly 90% of melanomas are thought to be caused by exposure to UV light and sunlight.

- It takes only one blistering sunburn, especially at a young age, to more than double a person’s chance of developing melanoma later in life.

- The World Health Organization’s International Agency for Research on Cancer (IARC) classifies tanning devices into the highest cancer risk category – carcinogenic to humans.

- Young people who regularly use tanning beds are 8 times more likely to develop melanoma than people who have never used them.

- Melanoma is not just a skin cancer. It can develop anywhere on the body – eyes, scalp, nails, feet, mouth, etc.

- The lifetime risk of getting melanoma is about 1 in 50 for Caucasians, 1 in 1000 for African Americans and 1 in 200 for Hispanics.

- Follow these tips to protect your skin:
  - Seek shade when possible
  - Cover up with clothing, sunglasses and a wide-brimmed hat
  - Try to avoid being in the sun between 10 a.m. – 4 p.m.
  - Use a broad-spectrum sunscreen with SPF of at least 30 and reapply every two hours
